I have taken the FGRV Conserve 3% Challenge!
...to conserve & prevent our wildlife ★ health ★ environment ★ economy
from being *thrown to the wind!*

This is what I have done or will do:

- Conserved 3% energy by _____
- Told others and challenged them to conserve 3% energy.
- Sent out letters to editors/legislators/community leaders/organizations.
- Printed out FGRV business cards/Conserve 3% fliers/newsletters & distributed them.
- Distributed yard signs/bumper stickers/window placards around my community.
- Put ads in local paper/Put radio FGRV ads on local radio.
- Add my email address _____ to FGRV list for updates.

Since wind's potential contribution is so small, modest conservation would avoid the adverse impacts of wind energy development. **National Wind Watch**

~The Friends of the Grande Ronde Valley is a grassroots non-profit organization educating the public about the impacts of wind energy on our communities, wildlife and planet. For more information, contact us at 541-568-4585 or go to our website:
